Litres  
 Gallons

### Capacity and Selection of Optimum Size Tanks:

DECCA sectional Tanks can be assembled to various capacities from 1000 litres (220 Gallons) to 2.19 million litres (481250 Gallons) by selecting the desired length and width from 1m to 25m, and height of tank from 1m to 4m in increments of 0.5m, as rectangular or square tanks or to any special size or shape such as 'L' shaped tank to suit conditions.

The table provides some sizes and capacities of tanks.
